[The government of President Luiz Inácio Lula da Silva sent a message to the National Congress requesting the withdrawal of a bill \(PL\) that would allow mining on indigenous lands.](#) Bill No. 191/2020, presented by former president Jair Bolsonaro in February 2020, was intended to regulate mining, tourism, ranching, and exploitation of water resources, oil, and gas within indigenous lands. Although it had an urgency request approved in 2022, the text was not analyzed by the House of Representatives and has remained stalled. PL 191 was the focus of indigenous mobilizations in recent years and was baptized &#8220;Bill of Death&#8221;.
